Motor Technology News May 2012

Free Seminars on EtherCAT and Ethernet

The EtherCAT technology group has organised a series of three free-to-attend seminars on EtherCAT and ethernet at venues across the UK from 22 to 24 May. Sponsored by key manufacturers, like Trio, the seminars are educational events, presented by experts, and will address issues like when and how to adopt these new generation networks over classical fieldbus systems that are increasingly challenged by new technologies.

Learn about the benefits and the challenges of Industrial Ethernet. Explore and understand EtherCAT technology, talk with EtherCAT experts face-to-face, and visit the sponsors' table-top exhibition. These full-day seminars specifically address users as well as system integrators to learn about EtherCAT and other Industrial Ethernet technologies.

You will find the seminars beneficial if you are:

- in charge of control & automation systems with machine builders and OEMs
- working with system integrators or design firms for machine builders or end users
- involved in application and controls design or product management
- interested to know the latest trends in industrial automation and how fieldbus selection plays an important role
- interested in application examples and possible migration strategy.

Go here for the seminars' **agenda**. Go here for the **venues** and go here to **register**.

Remember attendance is free of charge.

Running for Better Mental Health

On Sunday 20 May 2012, Andrew Fallows, Motor Technology's managing director, his son Mike and daughter Vicky are all running in the BUPA Great Manchester Run to raise money for the charity Mind.

The 10 kilometre run has a city centre route and will be braodcast live on BBC TV. Up to 40,000 will be taking part in the event, some running as individuals, and some running to raise money for their favourite charities.
